---

Dear Recruiter,

I am interested in applying for Software Engineer – Navigation position you have recently posted through Harman career portal. With my skills and knowledge base I would be able to help facilitate this process and with my ability to adapt to different situations I would be able to prepare for a variety of projects.

As a recent Computer Science graduate of California State University Los Angeles, I had the opportunity to hone my skills with tools J2EE, SQL, ASP.NET, JS, HTML, CSS, NODE JS, ANGULAR JS, and MOBILE DEVELOPMENT. I have practical experience on development and testing in an Internship at Augusta Hitech Software Solutions and gained a valuable first-hand experience in the software engineering field. Also, I had developed various projects during my academic period. I was responsible for full lifecycle development of a college's alumni association site and also was a part of a team on developing payroll software, from initial requirement gathering to design, coding, testing, documentation and implementation.

I am confident that my skills and experience qualify me as a strong candidate for an entry level position in your company and I would welcome the opportunity to interview with you. Thank you for your consideration.

Best,

Krishnakumar Rajendran
